

Pond Clarifier

This product is a 2-in-1 formulation, containing beneficial pond bacteria and barley straw. It is designed for use in watergarden ponds, Koi ponds and similar aquatic environments. The bacteria are non-pathogenic, and feed on decomposing organic wastes, such as fish waste, uneaten fish food, decaying plant debris, grass clippings, leaves and similar waste materials.

For best results, turn off UV sterilizer when using this product. Apply product directly to the pond water or the filter. Keep out of the reach of children. Not for human or animal consumption.

Jar Treats
24,000 Gallons

- Improves Water Clarity & Quality
- Reduces Bottom Sludge (Muck)
- Reduces Toxic Ammonia & Nitrite

24 Water-Soluble Packets

DIRECTIONS: Apply 1 oz (1 water-soluble packet) per 1000 gallons of pond water. Apply packet(s) directly to the pond water. They will dissolve within minutes of coming into contact with water. Apply weekly, or as needed, to maintain a clean and healthy pond!
