

One of the most comprehensive water conditioners available.

KEY BENEFITS

This formulation removes ammonia and nitrite, as well as chlorine and chloramines. It also detoxifies heavy metals (including copper), adds essential electrolytes, replaces skin slime coat, buffers pH and reduces stress. It is non-toxic to humans, pets & aquatic life when used at recommended rates.

This formulation is not a medication, chemotherapeutic agent or economic poison. This formulation is stable for an indefinite time frame, if kept in original container, and stored away from heat and sunlight. When not in use, store in temperatures between 60 F - 100 F. This formulation is compatible with most other water conditioners and antibiotics. It is not compatible with strong oxidizing agents. Also, do not use with unchelated copper medications, as this formulation will inactivate the "free" copper in that medication.

All-in-One Water Conditioner

Removes Ammonia & Nitrite

Removes Chlorine & Chloramines

Detoxifies Heavy Metals

Adds Slime Coat & Electrolytes

Buffers pH & Reduces Stress

**Bottle Treats
960 Gallons**

16 oz (473 mL)

SHAKE WELL BEFORE USING.

Apply 1 fl oz (5 capfuls) per 60 gallons of tap water, to remove 1 mg/L (1 ppm) ammonia. This product also removes nitrite, chlorine and chloramines, as well as detoxifies heavy metals (including copper), adds essential electrolytes, replaces skin slime coat, buffers pH and reduces fish stress.

KEEP OUT OF REACH OF CHILDREN.

Not for human or animal consumption. Avoid getting in eyes. In case of eye contact, rinse immediately with water. Wash hands after use. If swallowed, seek medical advice.
