

Water Clarifier (flocculant)

Super
Concentrated!

Clears murky water caused by organic particles (decaying plant material) & inorganic material (mud & clay)

Helps clear murky, turbid water by attracting suspended particles together, settling them to the bottom.

- Works great when used with our Pond Cleaner Bacteria's, the clarifier settles the organic particles to the bottom where they are consumed by our Beneficial Pond Bacteria's.
- One gallon treats 250,000 gallons of pond water, ponds with high levels of suspended solids can be treated at double dosage or a second application.
- For best results mix recommended amount with pond water and spray evenly over pond surface.

Contents One Gallon (128 ounces)
