

Pond Bacteria

POND & LAKE CLARIFIER

Treats
1/2 Acre Pond
for 3 Months

- Reduces murky water
- Reduces bottom-sludge (muck)
- Reduces ammonia, nitrite, nitrate & phosphate
- Reduces odors

This product is a natural formulation of beneficial pond bacteria for use in large ponds & lakes. It contains species of cold water bacteria, making this product effective in water temperatures ranging from 35-95 F. This 2-in-1 formulation contains barley straw as well as bacteria, which also helps to naturally clarify your water. This product has also been packaged into pre-measured water-soluble packets for easy application.

DIRECTIONS:

No measuring or mixing is required. Simply toss the water-soluble packets directly into the pond. Apply 32 water-soluble packets per 1/2 acre of pond or lake water, every 2 weeks. The water-soluble packets will dissolve within minutes of coming into contact with the water. Wait 48 hours after the use of a chemical pesticide before applying.

12 lbs (1 oz water-soluble packets)
