

All Natural Pond Phosphate Binder

100% Natural

Fish, Plant & Wildlife Friendly

Non-chemical alternative to remove phosphate: This is a safe and natural product that allows you to remove phosphate from water bodies

Adds beneficial trace minerals: This product adds approximately 70 trace minerals to the pond ecosystem.

Provides minor flocculation: This product provides a secondary benefit of settling out mud & clay.

Buffers pH

All natural powder formulation provides a non-chemical alternative to using (ALUM), to bind problem-causing phosphate in pond water. This all-natural powder formulation will also buffer pH and provide approximately 70 beneficial trace minerals for fish health and assist beneficial bacteria. It will also provide minor flocculation (settling) of mud & clay particles, and aid in reducing ammonia.

Directions:

Mix desired amount in a clean pail with 2 – 3 gallons of pond water. If necessary, stir the solution until the water is completely brown. Evenly distribute this mixture by pouring it directly from the pail along the shoreline.

Apply 2 1/2 lbs. per acre foot of water (325,829 gallons) to reduce phosphorous levels by approximately .05 ppm. Application rates vary depending on phosphorus levels in the pond.

5 Pounds Powder
